JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

of Natural History, the Peabody Museum at Cambridge, and the Field Museum at Chicago.

No one interested in archeology can refrain from thanking Mr Wren for his present and past services, and it is to be hoped that his zeal will lead him to continue his researches and to publish the results for many years to come.

ALANSON SKINNER

The Weathering of Aboriginal Stone Artifacts. No. 1. *A Consideration of the Paleoliths of Kansas.* By N. H. WINCHELL. (Collections of the Minnesota Historical Society, vol. XVI, part 1.) St. Paul, Minn., 1913. 4°, 19 pl., 20 fig.

The late Professor Winchell believed he had found a sequence of six cultures just south of the Kansas moraine in Kansas. His classification comprises early paleolithic, paleolithic, early neolithic (two stages), and neolithic (two stages). The term "paleolithic" is applied to the culture that antedated the Kansan Glacial epoch. "Early neolithic" covers the period between the Kansan and Wisconsin Glacial epochs, and "neolithic" applies to post-Wisconsin culture. This classification is based on the form and patination of the artifacts.
